Senior Data Engineer

work.gilangramadhan@gmail.com

PROFILE SUMMARY

A senior-level Data Engineer with extensive experience in designing and implementing Medallion data architectures within Azure and GCP environments. I possess a proven track record of building scalable ETL pipelines across the Telecommunications, Banking, E-commerce, and Mining sectors using PySpark, Apache Airflow, and Azure Databricks. My expertise includes delivering cost-optimized solutions by integrating diverse data sources into cloud storage and managing robust, high-availability serving layers for downstream analytics. I am highly proficient in managing large-scale data migrations, implementing metadata-driven systems, and optimizing data warehouse performance to drive significant business value.

WORK EXPERIENCE

- Multisoft Java Technologies - Java Developer** **Mar 2017 - Dec 2018**
Developed and maintained desktop-based applications using the **Java** while ensuring system stability through rigorous code analysis, testing, and debugging. Managed the full lifecycle of **data reporting** by building and optimizing complex queries using **JasperReports** and provided technical leadership by mentoring junior programmers in report development.
- Multisoft Java Technologies - Data Engineer** **Jan - Jul 2019**
Developed and implemented automated workflows using **Shell** scripts to streamline job scheduling and operational efficiency. Engineered robust ETL processes utilizing the **Scala** to handle complex data transformations.
- XQ Informatics - Data Engineer** **Aug 2019 - May 2021**
Served as a Data Engineer Consultant tasked with architecting specialized solutions for diverse client data challenges across major institutions including Telkom, Adira, and Bank Indonesia. Developed **Python-based** web services and **social media crawling** scripts to address specific business needs, implementing **advanced analytics** such as sentiment analysis and content filtering systems. Engineered robust data preparation and migration pipelines using **PySpark** on the **Cloudera** Big Data platform, while streamlining client operations through custom shell scripting and automated job scheduling.
- Bukalapak - Data Engineer** **Jun 2021 - Aug 2022**
Designed and maintained scalable data pipelines and **ETL** scripts using **Python** and **PySpark** to support e-commerce operations. Streamlined the development lifecycle by implementing **CI/CD pipelines** in **GitLab** and managed **data security and governance** within **GCP** Data Projects. Actively collaborated with stakeholders by evaluating and experimenting with various data platforms, including Datahub, Looker, and Databricks, to enhance data accessibility and insights.
- Xquisite AI - Senior Data Engineer** **Aug 2022 - Present**
Managed end-to-end data solutions across diverse industries, including the development of **crawling, scraping, and OCR scripts** for automated data acquisition from online media and PDF documents. Designed and implemented a **Medallion-based Data Warehouse** in **Azure** for HR data, utilizing ADLS2 for landing zones, Databricks (**PySpark**) for silver-layer transformations, and PostgreSQL to establish a cost-effective gold-layer serving environment. Engineered and maintained large-scale ETL pipelines using **Apache Airflow** to deliver tailored subscriber data for telecommunications clients. Led **data warehouse migrations** from **AWS** to **Microsoft Fabric** by developing high-performance scripts, pipelines, and interactive dashboards to ensure seamless transitions and data accessibility.

EDUCATION, TRAINING, AND CERTIFICATION

Statistics

Universitas Gadjah Mada

Sep 2012 - Feb 2017

Beyond my academic pursuits as a Statistics student at Universitas Gadjah Mada, I actively demonstrated leadership and organizational commitment as the Coordinator of the Media and Information Division for the Himpunan Mahasiswa Statistika, while also contributing to major campus events such as the National Statistics Olympiad, National Statistics Seminar, and university-level freshman orientation programs.

Furthermore, my undergraduate research is published at the [UGM Electronic Theses and Dissertations repository](#).

Azure Data Engineer Associate Certificate (DP -203) | [Verify on Credly](#)

Microsoft

Mar 2021 - Mar 2024

Validated expertise in integrating, transforming, and consolidating data from various structured and unstructured data systems into structures that are suitable for building analytics solutions using Azure services.

SKILLS

Data Engineering & Architecture

- Data Architecture: Medallion Architecture (Bronze, Silver, Gold Layers), Data Mart Design, Star Schema, Data Warehouse Migration (AWS to Microsoft Fabric).
- ETL/ELT Development: End-to-end Pipeline Orchestration, Metadata-driven Pipelines, Incremental & Full Load Strategies, Data Migration.
- Data Processing: PySpark (Large-scale processing), Spark SQL, Data Cleaning, Validation, and Standardization.

Cloud Platforms & Ecosystems

- Microsoft Azure: Azure Databricks, Azure Data Factory (ADF), Azure Data Lake Storage (ADLS Gen2), Microsoft Fabric, Azure Database for PostgreSQL, Azure Synapse Analytics.
- Google Cloud Platform (GCP): BigQuery, GCP Data Projects, Compute Engine, Dataproc, Permission Management.
- Others: AWS (Migration source), Cloudera Platform, Snowflake.

Programming & Tools

- Languages: Python, SQL, Scala, Java, Shell Scripting (Bash), R.
- Orchestration & DevOps: Apache Airflow, CI/CD (GitLab), Docker (Containerization), Git System.
- Databases: PostgreSQL, MySQL, MS SQL Server, Hive, Impala.
